

Countdown Timers

Envoys Electronics is one of the largest manufactures for Countdown timers in India.

Countdown timers are digital displays to indicate the time remaining for the next change of signal sequence. They are either installed alongside the Traffic Lights for the motorist to get the information on the time left for the signal to be green from red or vice versa.

The countdown timers are one of the most important equipment for the pedestrian as this gives them information on how much more time they are left to cross the zebra crossing. The count-down timer can be programmed to start either when the desired signal indication appears or when the flashing DON'T WALK or Hand indication appears.

Few Features of the Countdown timers are as below:

- Super-bright, long life, high quality selected LEDs are used in the display assembly
- Inform the road users about the time left from red to green or vice versa
- Count down timer consists of in-built smart sensor for 3 channels, Red / Amber / Green timing, which detect the duration of each stage.
- The numerals are readable from a minimum distance of 100 to 400 meters depending upon the Digit size selected.
- The dual colour versions glow the same digit in two different colours depending upon the input feed.
- Available in different digit formats like 2, 2½, 3
- Can be custom designed to match the requirement of the customer
